**Bomb Threats and Earthquakes**

PROTECTION FROM  
AN ACTIVE SHOOTER

PROTECTION FROM  
BOMB THREATS

PROTECTION FROM  
EARTHQUAKES

# HIDE-AWAY®

SAFETY SHELTER

We live in a patio home so we're glad to have our Hide-Away right outside our kitchen door, in the garage. It doesn't take up much room, and I sleep a lot better knowing it's there if we ever need it.

Mary Ann & Roger

OPTIONAL COLORS AVAILABLE

## Safety, security & peace of mind

Our shelters provide flexibility and features not available from competitors. Our ability to configure the shelters to any size or shape along with unique options such as a tornado proof window and military grade ballistic steel construction (optional) provides you the safest alternatives available. All of our Hide-Away Shelters are certified to provide protection from devastating EF-5 tornadoes. In addition, our standard shelters made from 1/4" steel plate provide protection from handgun and shotgun rounds. This is the ultimate product to provide protection for your family.

PROTECTION IN PUBLIC SPACES: Churches, Schools, Workplaces, etc.

## Stationary Units

- Economical
- Modular design
- Installs in any room
- Can be expanded / modified to accommodate evolving needs
- Variety of shape / configurations to accommodate different space requirements
- Ease of installation due to bolt-together design
- Entire unit is coated with exterior grade powder coating

## Corner Units

- Fits in corner to save space
- Left or right swing door

### Options for all units:

- Custom paint colors
- Entire unit is coated with exterior grade powder coating
- Ease of installation due to bolt-together design

## Under the Bed Units

- Available in Twin, Queen and King sizes
- Stops all hand gun and shotgun rounds
- Level IIIA protects up to .44 magnum handgun and shotgun rounds
- Ease of installation due to bolt-together design
- Entire unit is coated with exterior grade powder coating
- Level III protects up to 7.62 NATO (.308 caliber) full metal jacket rounds
- Provide your loved ones with a safe place to go no matter what the cause

TWIN, QUEEN & KING SIZES

NEW PRODUCT

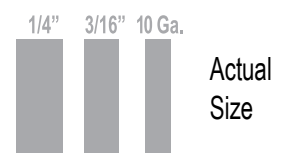

The power of an EF-5 tornado is unlike any other force on Earth. That is why we find it ironic we have been accused of “over-engineering” our shelters. The designs go well above the standards set by FEMA and the National Wind Institute (NWI) because we know the unbridled power of nature is nothing to take lightly.

It's one thing to withstand a two-by-four being shot out of a cannon (NWI test), but some things can't be duplicated in a lab. An EF-5 tornado can pick up cars and toss them like toys, topple brick buildings and turn towering oaks into splintered piles of brush.

We don't want families seeking shelter in anything less than something made of 1/4" steel plate. Please be sure to give proper consideration to the thickness of the steel used. It is not a decision you ever want to second guess.

- Shelters able to be moved and relocated
- Only shelter on the market with a window of 1.25" bulletproof polyurethane glass
- Multiple configurations available
- Expansion options after installation
- Shelter size can grow as your family grows, has modular add-on options
- Can expand to be made for as many as 160 people
- Most durable shelter on the market

We use 1/4" thick steel on all units whereas others use sheet metal less than half as thick.
